

Cloud Acceleration Program

Enhance Your Cloud Adoption Experience with Microsoft FastTrack

Moving into the Microsoft cloud, or expanding your footprint there, shouldn't be arduous. Instead, a resource exists that can make cloud moves more efficient, secure, and yes, fast. Furthermore, it's one your organization may already be able to access.

Microsoft FastTrack is an ongoing benefit built into the technology leader's licensing model in order to help organizations get the most out of their cloud investments. FastTrack gives organizations direct access to a select group of partners and their leading cloud resources, ensuring the expertise needed to take your digital transformation efforts to the next level is always on standby. Arraya Solutions is proud to count ourselves as one of those partners, also known as a FastTrack Ready Partner.

BLAZING A MORE EFFICIENT, SECURE PATH TO CLOUD ADOPTION

As a certified FastTrack Ready Partner, Arraya stands ready to work with our customers to help them shift their Microsoft cloud initiatives into high gear. Our experts can assist with:

- **planning for and prioritizing deployments and migrations** to ensure they unfold in a way that is consistent with organizational need and which results in the least amount of disruption possible for end users and their workdays.
- **standing up a variety of Microsoft 365 applications**, including Exchange Online, Microsoft Teams, OneDrive for Business, as well as solutions such as Enterprise Mobility + Security and Azure Active Directory. Post deployment, Arraya's team can also help migrate organizational data into these solutions.
- **configuring essential identity and security features**. Data must be kept safe no matter where it lives. Arraya's experts will ensure the necessary defense mechanisms are in place and properly tuned to keep cyber criminals at bay.
- **clearing up compatibility issues** between modern desktop environments and preexisting applications, including line of business apps built in-house, those developed with the support of a third party provider, and virtualized apps.
- **activating chat-based and productivity apps**, such as Microsoft Teams, to go beyond transforming an environment, instead modernizing the ways in which users and teams work together and collaborate on projects.
- **increasing user adoption of a new solution** by helping to spread the word about its benefits and fostering opportunities for hands-on learning experiences. Besides making teams feel more at home through interaction, focusing on adoption can also help realize pre-project ROI goals more quickly.
